- The frame needs to be made out of wood that will not crack or warp with heat.
- The back needs to be made out of the same type of wood.
- Each section needs to accommodate a plastic box which measures 81 cm long, 62 cm wide, and 22.5 cm high.
- The measurements for the plastic boxes, minus the wooden frame, are 81 cm long, 186 cm wide, and 180 cm high.
- If a 1 cm gap is left between the top of each plastic box and the shelf above, this will provide adequate ventilation that will reduce the need for drilling each box.
